Subject Index to Volume 19

Age differences:
  effects of, organization and working memory on, for scene information, 321
  impact of on maze learning mice, 259
  in content scales of the Minnesota Multiphasic Personality Inventory, 241
  in free recall and category clustering, 15
  in memory for spoken text, 111
  in monitoring of practical problem-solving, 129
  in spatial memory, 333
  in summarizing descriptive and procedural texts, 39
  in temporal memory, 351

Behavioral disorders, age-related, and folate administration, 367

Category clustering and free recall, adult age differences in, 15
Cerebral perfusion and leuko-araiosis, in normal aging, 225
Complexity hypothesis, speech recall and, 111

Direction loss, evidence of in relation to spatial orienting effects, 71

E-I-E-I-O model, 277
Exploratory and locomotor activity, in mice, 177

Folate administration, age-related behavioral disorders and, 367

Free recall and category clustering, adult age differences in, 15
Frequency judgment, and generation effect, 147

Gender differences, in content scales of the Minnesota Multiphasic Personality Inventory, 241
Generation effect, and frequency judgment, 147
Gerontology, research methods for, 189

Health, self-rated, life goals, and satisfaction, 97

Leuko-araiosis and cerebral perfusion, in normal aging, 225
Life goals, satisfaction, and self-rated health, 97
Locomotor and exploratory activity, in mice, 177

Maze learning in mice, impact of age and situation-specific experience on, 259
Memory:
  and organization, in elderly subjects, 29
  failures, physicians appraisal of, 195
  incidental and prospective, effect of aging on, 165
  spatial, age differences in, 333
  temporal, age differences in, 351

training, the E-I-E-I-O model, 277
working, effects of on age differences for scene information, 321
Minnesota Multiphasic Personality Inventory, age and gender differences in content scales of, 241

Neuroendocrine theory of aging and degenerative disease, 291

Organization:
effects of, on age differences in memory, for scene information, 321
and memory, in elderly subjects, 29

Piloting tasks, influence of aging and practice on, 53
Posture control, cognitive penetrability of, 1
Problem-solving performance, age differences in, 129

Shiftwork and the older worker, 295
Situation-specific experience, impact of on maze learning in mice, 259
Spatial orienting effects, relation of to direction loss, 71
Stroop Color-Word Test, aging effects assessed with, 209

Texts, procedural and descriptive, age differences in summarizing, 39
